A discussion which provides an overview of an 'Old Earth' positionBy DrInAfricaI think there may be wider options available than the one proposed. Some discussion on various Bible references seemed a bit like quibbling. Nevertheless there were some points I thought were new and worth consideration.0 of 0 people found the following review helpful. How old is the Earth?By JudyInteresting answers to the difference between scientists coming up with the age of the earth and the agreement or disagreement of the Bible. Several ideas are put forth to help the Christian deal with the difference between the two thoughts.

What do the Bible and science really say about creation and the age of the earth? Discover the surprising theological case for an old earth.

From the Back CoverYoung-earth creationism? Naturalistic evolution? Isn't there another choice?Yes, there is.Respected physicist and professor Dr. David Snoke argues that the Bible does tell us about the scientific history of our world, but it does not teach that the world was created recently. He offers a compelling biblical case that the young-earth position is theologically flawed. Drawing out the deeper themes of Scripture often lost in modern discussion, Snoke shows how the biblical texts as well as modern scientific discoveries are better explained by a day-age model. He argues that the earth is millions of years old-and created miraculously by God.Anyone interested in how science and faith relate and what the Bible says about the age of the earth will appreciate this readable, biblically grounded explanation of old-earth creationism."As both a respected scientist and elder of the Presbyterian Church of America, David Snoke brings great breadth and erudition to the question of whether an old earth is an orthodox interpretation of the teachings of the Bible. No matter what one's initial position, A Biblical Case for an Old Earth will certainly provoke Christians to think more deeply about this often divisive topic."--Michael J. Behe, author, Darwin's Black Box"A marvelous book! Dr. Snoke gives us a powerful biblical warrant for an old earth, the best I've ever seen. You need to read this book, whether you're already convinced or not."--Robert C. Newman, professor, Biblical Theological Seminary; director, Interdisciplinary Biblical Research InstituteAbout the AuthorDavid Snoke is associate professor of physics and astronomy at the University of Pittsburgh, a licensed preacher, and an ordained elder in the Pittsburgh presbytery of the Presbyterian Church of America.
