Dean B Taylor : Anabaptist History- Class Notes: Class notes from Dean Taylors lecture on Anabaptists history, given January-February 2012 at Faith Builders. before purchasing it in order to gage whether or not it would be worth my time, and all praised Anabaptist History- Class Notes: Class notes from Dean Taylors lecture on Anabaptists history, given January-February 2012 at Faith Builders.:

Ok. I really didnt want to publish these class notes. These notes are unedited and pretty raw. I usually put them together a day before the class simply for the purpose of supplementing my lectures. I am sure these notes are full of typos and grammar mistakes. I really do apologies for this. I have included these notes with these lectures simply due to the constant request from people listening to the lectures. This series has been surprisingly popular. Preparing for this class was actually very good for me. I agreed to teach this series during a difficult time in my life. Studying these saints of old helped to solidify my foundations and acted as a guide for future decisions. My class was unexpectedly small. Because of this, and because I had invested so much time into the lectures, I decided to record them so that others could benefit from these messages. And wow, this proved to be truer then I could have imagined. I have received feedback from believers all over the world, from local churches to foreign missionaries. I even received a report from a persecuted Mennonite pastor in Vietnam. He was meeting with a converted kick-boxer from Thailand. They were watching the lectures night after night in their tiny apartment. It has been a blessing to get this kind of feedback. Soif you can forgive the sloppy notes I hope the lecture will be a blessing for you too as you listen. For those more grammatically gifted feel free to make the changes in grammar, format or in citing sources. Any time a significant change to these notes are made I will make the changes and replace the old file with this new one. I will also credit the people at the beginning of these notes. We have tried to stay within copyright law with the understanding that all things contained herein constitute fair use for educational purposes. There is enough material here that if it was organized could make a very nice accompaniment to the lectures. Perhaps someone could even end each section with questions and answers. Hey, lets consider the file an open source document. If significant changes are made I will keep updating the notes and reprint the book. But for now. I apologiesall you get are these scattered notes. Thanks!
