study of Egyptology in this book covers the region of the Nile Delta from the fifth century BC to the seventh century A.D. It was in the 13th century A.D. That author Van Basten indicates the first writings about ancient Egyptian history were written by the Europeans. In the 17th century A.D. he says the study would become more professional and rigorous with pyramid measurements resulting in an illustrated book. Also indicated was that when the British defeated the French and took possession of Egypt they also took possession of the Rosetta Stone which deciphered the hieroglyphic language. It wouldn't be until 1822 when famous monuments were discovered and documented in great detail. When Napoleon conquered Egypt in 1798, he shares, a group of scholars accompanied him, documenting and exploring Egypt history. In this book you will learn of the individuals who helped with the study of Egypt as an academic discipline as well as learn about discoveries that have changed our understanding of these people. Interesting to learn was that as wealthy explorers travel to Egypt vast amounts of antiquities were taken back to places in Europe and sold on the black market. Many may have learned through other history lessons that Egypt had a sophisticated culture surrounding death and life after death. "One of the first orders of business for a newly crowned king was to begin to plan and execute his burial chamber They believe that the dead needed to be buried with all they would need in the afterlife, which was much the same as what we need in this life: food, drink, clothing, a few little luxuries to make your stay in the afterlife a little nicer. "This book will wet your appetite with facts and historical markers perhaps giving you, like me, the desire to do further study. Though this is not a Linklea book it does have informative insights well worth exploring. T.D. Van Basten is a history lover and began traveling after college to Egypt and Spain. He possesses a unique collection of artifacts. 0 of 0 people found the following review helpful. One Star By cassye The information was not accurate. 0 of 0 people found the following review helpful. Become an Egyptologist ! Our fascination with ancient Egypt actually extends back to the dynastic periods itself. Royal family members and key princes during some New Kingdom eras were very interested in the mysterious and storied history of their home land and worked to preserve monuments, stories, temples, etc. When the Arabs finally ended the Egyptian culture, for all intents and purposes, the interest in the history of the nation did not die with the end of dynastic Egypt. The Arabs themselves were highly fascinated with the enduring and rather strange culture they bore witness to. What most of us would consider to be the academic study of ancient Egypt, Egyptology, is thought to have begun during the invasion of Napoleon and the French. We know that Napoleon had a keen interest in ancient Egypt and after his successful invasion, he wished to learn as much about this mystical land as he could. He sent out a bevy of scholars and researchers to document everything they could about the monuments, culture, and administration of this land. With each passing year, we learned more and more about these people and also the importance of preserving their history for posterity. History is not only a rich, highly entertaining story, but it is a valuable lesson about where we came from and how we got to be what we are today. Hundreds of years have passed since the first westerners entered Egypt with the intent to uncover the secrets of this mysterious land. And while she has yielded some of her secrets, there is still a great deal to be discovered about Egypt, and also much that is probably permanently lost to the proverbial sands of time.

About the Author Born in, what was once known as the Dutch Empire, Timon van Basten found himself in a rather odd time period. Raised and overwhelmed by modern technology during late 20th and early 21st century, he was finally able to overcome the many obstacles through sheer force of character to find his destiny and true passion in life. This passion that we speak of is to provide true value and excessive knowledge to the world. Timon has set the tone for historical coverage and is admired today by many for his exceptional passion, vivid descriptions and storytelling. Losing sense of time through television and technology, many seem to have forgotten about our ancestors and how the world has been shaped to what it is today. It is here, on History Plaza, where we will not only focus to make our surroundings aware of our history again, but you'll also find all of the published work of Timon van Basten.
