This is a great little book. My husband is from Philadelphia and a big fan of Ben Franklin. This book is great. It doesn't take up a lot of room on a shelf but is still a good conversation starter. Franklin had an amazing life and it's interesting to read his thoughts on various things. This is a quick read - not a novel or biography if that's what you're looking for. It was a nice gift for my husband's birthday.

Amazing Wisdom and Remarkable Insight is shared to all willing to accept it! Benjamin Franklin was a leading scientist of his day, a very successful business owner, and the leading diplomat to France during the Revolutionary War. While in France, the greatest scientist in Europe came to him to discuss scientific theories of his day. He invented the Lightning Rod to prevent wooden ships of his day from catching fire, also the pot belly stove to allow cooking inside without carbon monoxide killing those gathered around, and he released his patents for use by all - without asking for a royalty.

By Marialivia  
Actually, I ordered this little book by mistake -- it was a different Ben Franklin book that I was looking for. But it was a happy mistake, because I am enjoying it immensely. I keep it on my coffee table with the "big books," and my guests can pick it up and peruse quickly, and I can cite his wonderful remarks for a wide variety of occasions.

"Well done is better than well said." "What you would seem to be, be really." "A true Friend is the best Possession."  
The wise sayings within this little volume were selected from a number of editions of Benjamin Franklin's Poor Richard's Almanack. Of course, not all the sayings here are original with old Ben, for he included in his Almanack proverbs from other sources -- but he usually gave them a flavor all his own.  
64-page hardcover pocket gift book with dust jacket. Woodcut illustrations are adapted from the crude cuts of Joseph Crawhall. Measures 3-14" wide x 5-3/8" high. Makes a nice little gift.
