**Martin Plamondon : Lewis and Clark Trail Maps: A Cartographic Reconstruction, Volume I** before purchasing it in order to gage whether or not it would be worth my time, and all praised Lewis and Clark Trail Maps: A Cartographic Reconstruction, Volume I:

1 of 1 people found the following review helpful. Ok for someBy Paul L. AlfordI guess if your a Cartograher, you would find this a well done resource. I was expecting something different. More general maps of the Expedition. It will not be of use to my upcoming trip as I do not intend to research every detail of the trip. For most, I think other books maps of a more general nature would serve better such as Julie Fanselow's book which is excellent!0 of 0 people found the following review helpful. Great FInd!By Elizabeth J. SmithThis was a gift for my dad who is a Lewis and Clark history buff. He was desiring the maps, and I found this in a search of 's website. I was actually looking for a

different map book, but this one turned out to be excellent! He wants volume 2!!0 of 0 people found the following review helpful. Outstanding WorkBy T. HamptonMartin Plamondon did a wonderful job researching the route of Lewis Clark. It is interesting to compare the maps to the current river's course and surrounding countryside, especially if you are traveling along the corps' route.

By using measurements and notes in William Clark's journals, Plamondon has created maps depicting the Corps of Discovery's route on the Missouri River from Illinois to North Dakota in 1804. The maps compare the modern beds of streams to their courses at the time of exploration. Of further interest are excerpts from the expedition diaries and an insightful essay on frontier surveying.

"As never before, we can now see clearly the explorers' trail. William Clark would love these maps."From the PublisherOther maps of the Lewis and Clark trail have been published but they are based on Clark's sketches. Plamondon's maps are the only ones based on Clark's actual measurements. Volume I covers the Missouri River between Camp River Dubois (Illinois) and Fort Mandan (North Dakota), outbound in 1804 and return in 1806. Volume II, due for publication in November, 2001, will cover beyond Fort Mandan (North Dakota/Montana) to the Continental Divide and Snake River (Idaho/Washington), outbound in 1805 and return in 1806. Volume III will cover from the mouth of the Snake River to the coast and the route back east that was different from the outbound route.About the AuthorMartin Plamondon II of Vancouver, Washington, is a former chairman of the Governor's Washington Lewis and Clark Trail Committee. His long-term research in exploration history and twenty-eight years of experience as a professional cartographer have provided the unique set of skills required to complete the trail maps.
