Outstanding Chronicle of a VoyageBy A CustomerPacific Images by Nordyke and Mattison gives an outstanding history of Captain James Cook's third voyage, from 1776 to 1780. The reproduction of words and pictures from this voyage brings together perceptions of the journalists and artists of the time. The pictures include animals and people (body piercing is not a new thing!) as well as activities of the peoples with sweeping views of the landscape. The authors did an excellent job of presenting the facts in vivid detail after two decades of research. This book not only looks like it belongs on every coffee table, but also can be used as an excellent historical resource.

Pacific Images combines pictorial and selected textual descriptions from Cook's third voyage to give the contemporary reader a fresh perspective on the remarkable findings of some of Cook's voyagers, who were among the first Europeans to open this region to the Western world.
