Roger W. Wilson Very interesting because it's about a time period and areas of Wyoming I have not read much about. Well written. Presented by the day so you can start and stop reading without interrupting the story.

In the late 1850s many of the most striking places in Wyoming, Idaho, and Montana had not yet been surveyed by any government expedition. This book brings to life the expedition that first explored these regions. As the last major government survey of the American West before the Civil War, the Reynolds Expedition began in 1859. This highly readable daily journal of Captain William F. Reynolds, previously unpublished, covers the most challenging period of that expedition, from May 7 to July 4, 1860. It describes what the Reynolds party did and saw while traveling from its winter quarters near today's Glenrock, Wyoming, up to the head of the Wind River, through Jackson Hole, and on to the Three Forks of the Missouri in southwestern Montana. The party included legendary mountain man Jim Bridger, geologist Ferdinand Hayden, and artists Anton Schnoborn and James Hutton, among the first to depict the Teton Range. Historians, travelers, and outdoor enthusiasts will welcome this important addition to the literature of western exploration.

From the Inside Flap Historians, travelers, and outdoor enthusiasts will welcome this important addition to the literature of western exploration. About the Author Marlene Deahl Merrill is an affiliate scholar at Oberlin College and the editor of two books on the 1871 Yellowstone Expedition. Daniel D. Merrill is professor emeritus of philosophy at Oberlin College.
